

Cyber Security & IT

Cyber Security - It's been widely reported recently that cyber incidents are costing Australian businesses over \$3.5bn per year. Malicious internet activity can critically impact business operations and systems, with breaches of data and client confidentiality leading to potential legal action and fines.

Centium's certified **Cyber Security & IT (CSI)** team can assess your organisation's cyber security requirements and recommend and implement necessary technical remediation action. We can also ensure your IT systems comply with relevant standards, thus providing your customers with the confidence they require to transact with your business.

Centium's cyber specialists and certified delivery partners can help you implement best practice solutions, from high impact risk assessments and audits, through to awareness training, tailored scenario testing and full business continuity and disaster readiness services.

YOUR CHALLENGES

- Effective information management and cyber security management systems (ISMS)
- Security & confidentiality of information
- Compliance with regulations and standards
- Security over credit card transactions
- Developing & maintaining fit for purpose business resilience frameworks and plans
